

Sontara®

AUTOMOTIVE REFINISHING

1000001969

Clean-Up Wipe

- Tough and durable for multiple reuses.
- Works fast for excellent wipe-dry.
- Made of 100% cellulosic and renewable raw materials.
- Cost-effective-users find they need fewer wipes for each cleanup laundered shop towels.

ADVANTAGES

Safe in Use

Complete System

Low Cost in Use

Low Lint

Fit for Use

Sontara® Surface Preparation System offers the right wiping product for every stage of the refinishing process to achieve the high quality automotive refinish you are looking for. The unique hydroentangling process from Sontara® uses thousands of high-pressure, needle-like jets of water to entangle the fibres into a Sontara® fabric that's strong and low-linting.

Reducing sources of lint or loose fibres can minimize the potential for paint defects. With Sontara®, you get great performance from start to finish.

PRODUCTION METHOD

Sontara®

RECOMENDED APPLICATIONS

- Multipurpose Cleaning.
- Light duty jobs, such hands, spills and equipment cleaning.
- Cleaning glass and windows.
- Ideal for the refinishing process.
