

Sontara®

AUTOMOTIVE REFINISHING

1000001907

Primary Tack Cloth

- Medium "tackifier"-removes dust & overspray between coats.
- Virtually no fraying or linting.
- Users report it reduces static buildup on plastic parts and other surfaces.

ADVANTAGES

- Safe in Use
- Complete System
- Low Cost in Use
- Low Lint
- Fit for Use

Sontara® Surface Preparation System offers the right wiping product for every stage of the refinishing process to achieve the high quality automotive refinish you are looking for. The unique hydroentangling process from Sontara® uses thousands of high-pressure, needle-like jets of water to entangle the fibres into a Sontara® fabric that's strong and low-linting.

Reducing sources of lint or loose fibres can minimize the potential for paint defects. With Sontara®, you get great performance from start to finish.

PRODUCTION METHOD

Sontara®

RECOMENDED APPLICATIONS

- Removing medium residues – picking up loose debris.
- Wiping surfaces to remove dust from sanding.
- Prepping a surface before sealing and prior to base coat.
- Application where a medium tackifier is needed.
